

.An exceptional honey with unique features exclusive to Infiny Honey, and unmatched in the market

 !You don't need blends or unknown compounds – nature takes care of it for you

This is an extraordinary honey in both type and density, derived from the bees feeding on a vast array of flowers from our apiaries across six different regions: the Aurès Mountains, the Namentcha Desert, the High Plateaus, and .the Eastern Coast's plains

This is incredibly difficult to achieve every year. It requires the transportation of large apiaries at different times so that the bees can feed on a variety of flowers in different regions and climates. This results in one honey that naturally gathers all those plants from all those regions without needing any blending or human intervention in its feeding. Achieving this requires a specialized scientific team that works alongside beekeepers to ensure the .precise timing of flowering and frame sealing by the bees

****Unique Features of Infiny Whole Honey****

flower types have been counted, with over 80% concentration of pollen in this honey. There are more than 12  .33 other flowers with lower concentrations, not counted according to Infiny Honey standards

heavy metals detected (environmental contamination), considered a high-quality mark, as the globally 0.11%  acceptable level for pure honey is 0.60%. This indicates that all Infiny Honey apiaries are free from industrial .contaminants

sucrose detected (naturally occurring from the bees' activities), much lower than the global maximum 2.15%  allowed in pure honey (5%), indicating the bees' exceptional activity in breaking down natural sugars within the .honey

."The flower types in this honey are perfectly balanced, and it is scientifically classified as "All-Flower Honey" 

****High-Density Pollen Flowers in Infiny Honey Complete****

(Wild Sidr (Sidr el-Berri) 

Eucalyptus 

Lemon 

Albahia 

Chamomile 

Black Centaury 

Wild Mustard 

Bouhadad 

Gum Acacia 

Yellow Centaury 

Lablab 

Borage 

****Health Benefits of Infiny Honey Complete****

The strongest pure honey in terms of plant diversity from various regions, and it is the best overall for strength 
and support

.Excellent for children and athletes as a complete food and natural energy source 

.Helps with anemia and alleviates symptoms 

.Excellent for liver health, relieving some symptoms 

Excellent for fertility, increasing sperm production, and improving male reproductive health by enhancing blood 
circulation

.Relieves menstrual pain and reduces the severity of menopause symptoms 

.Excellent for respiratory health, particularly for whooping cough 

.(Antioxidant-rich (cancer prevention 

.Beneficial for heart, arteries, and blood vessels 

.Effective in reducing skin cracks and dry skin 

.Good for reducing fatigue and improving sleep quality 

.Relieves intestinal and stomach inflammation 

.Acts as a natural laxative against constipation 

.Good for gum health and strengthens teeth 

.Excellent for ovarian health in women 

.A natural stimulant for the reproductive system 

.Good for bronchial inflammation 

.Excellent for wound healing 

.Prevents osteoporosis 

.A powerful immune system booster 

.Beneficial for blood pressure patients 

.Good for prostate health 

.Relieves joint pain 

.Excellent for nasal congestion 

.Good for treating tumors 

.Improves digestion 

.Good for memory 

.Our bees only feed on nature—no sugar or manufactured substances 

.(Our honey is exceptionally high in pollen concentration (discovered in detailed analysis 

To preserve the therapeutic properties of our honey during storage, we provide special packaging made of 🐝 non-recycled food-grade glass, with a wooden stopper and sustainable sealing when opened and closed. Our external packaging is made of wood and special fabric resistant to moisture

Produced according to scientific methods complying with global quality standards outlined in the World Health 📌
🇧🇪 .Organization and the United Nations Food and Agriculture Organization's Food Code

Subjected to microbiological, physicochemical, and pollen analysis in a government-certified laboratory, 📌
licensed by the Ministry of Commerce and Ministry of Justice, supervised by specialized doctors and engineers of .the highest level
